Spirit of Prophecy Books:

Everyone will get an electronic copy of EGW writings to install on their computer for free. Because students might not always have access to the computer, a hard copy of the Conflict of the Ages is highly suggested. A quite reasonable option is to purchase a History of Redemption book that includes the Conflict of the Ages series along with a few other books. You can also purchase them separately if you do not have them as this is a great time to start your SOP collection.
